Subject: RE: December 8 meeting follow-up

Hi Lynn,

A bullet "DTSC shall enter into an Operation and Maintenance Agreement for OU10 if the final RAP and approved RD/RA activities require O&M." This is the mechanism that covers the O&M and long term monitoring of remediation systems. Thanks.

Steve.

Thanks, Steve.

I'll check in with Caleb, Julie, and Larry Bradfish to see if they have any additional comments before this is routed to John Lyons for signature—I haven't received any so far but people have been in and out. All of the edits look good to me but I need to check with Larry on the particulars regarding vapor mitigation system requirements (Chris' earlier email comment).

Have a happy new year!
Lynn

Hi Lynn,

Charlie is okay with this attached version of the letter that was edited by Chris and Alex. Then we will have time to provide a response accordingly. Thanks.

Steve

Subject: [EXTERNAL] RE: December 8 meeting follow-up

Hi, Chris.

I just now finally sent out the revised OU10/Area 40 letter to EPA/DTSC/RWQCB for comments. I requested all comments back from reviewers by 6 Jan; I attached the revised draft, fyi.

I did get comments back from Trudy on the SLERA on 18 Dec, but I didn't receive any back from Ned yet. I attached the email with Trudy's additional comments but please wait a bit longer to give Ned more time to review them.

A few of us have been out sick and with the holidays approaching, it may take a bit longer to wrap this up. But we have some progress!

Happy holidays to you,
Lynn

Subject: December 8 meeting follow-up

Hi Lynn – Just following up on agreements from the December 8 meeting.

- Have you sent out the revised Area 40 letter for review? Not sure if I would have been copied, but I hadn't seen it, so I am just confirming.
- How about the final comments on the IOU SLERA? I believe you were going to submit final comments by December 18.

Thanks, Chris
